## Help NC GreenPower protect your environment.

NC GreenPower is an independent, nonprofit organization established to improve North Carolina's environment through voluntary contributions toward renewable energy. A landmark initiative approved by the NC Utilities Commission, NC GreenPower is the first statewide green energy program in the nation administered independently by a nonprofit organization and supported by all of the state's utilities. The program is designed to improve the environment by encouraging the development of renewable energy resources through consumers' voluntary contributions to NC GreenPower.

Your support will help add more renewable energy to the power supply in our state.

### NC GreenPower offers two contribution options:

The first option is designed primarily for residential or small commercial customers. It features energy produced from renewable sources, such as wind, solar or methane sources. Customers can purchase one or more blocks of clean energy for North Carolina. You can make a contribution of \$4 per block (100 kilowatt-hours of energy).

The second option is designed for large-volume users, but it can be purchased by any customer and features energy produced from a wider range of sources, such as biomass and small hydro, at a price comparable with out-of-state green energy tags. Customers pay \$2.50 per block of 100 kilowatt-hours but must buy a minimum of 100 blocks.
